The present invention relates to a lithographic apparatus and a device manufacturing method. 2. Related Art A lithographic apparatus is a machine that applies a desired pattern onto a target portion of a substrate. The lithographic

---

apparatus can be used, for example, in the manufacture of integrated circuits (ICs), flat panel displays, and other devices involving fine structures. In a conventional lithographic apparatus, a patterning means, which is alternatively referred to as a mask or a reticle, may be used to generate a circuit pattern corresponding to an individual layer of the IC (or other device), and this pattern can be imaged onto a target portion (e.g., part of one or several dies) on a
