What's New in the?

Dtop Blizzard is a screensaver that gives you the chance to experience a realistic blizzard on your computer. Without the freezing temperatures of course. The screensaver comes with 10 winter scenes for it to snow on, an image of your choosing, or just let it snow on your desktop. There are many settings to play with and change including, size, how much snow, how much wind and types of snowflakes. There are two types of snowflakes to choose from. There is a functionality limitation with the blizzard part of the screensaver, in that it will only use the larger snowflakes (which I designed for the screensaver, and not the small snowflakes, which the screensaver gives you the ability to use). Installation: 1. Download and Install .zip File 2. Open .app and wait until the resume script screensaver has saved it's settings. (It will generally saved it's settings after it has been active for 2 or 3 minutes.) Note that this time may be different from screensaver restarts. 3. Close the Resume script screensaver app. 4. Click Windows program icon 5. Select Start Screen Saver 6. Select Enable Windows 7. Select Play Dtop Blizzard 8. Click OK Gallery Screenshots How To Use Please log in to save your settings.
