Motion Dots Technology: Ninja Motion Dots enables gameplay, and camera angles. Players and objects will react differently depending on their speed and if they are moving towards or away from you. This means you can exploit players with the uncanny ability to predict what they’re going to do. As well as this, player movements and actions are extremely fast. Use your brain to predict what players are going to do on the pitch. Face Action Technology: In real life, we all have a tendency to communicate with facial expressions. In football, players also interpret and react to face movements. This is an area that has been overlooked in video games, but Fifa 22 Serial Key has it right. You can use player’s faces to unlock new tactics and outsmart your opponent. Front Deflection Technology: When it comes to stopping a players passing through the goalmouth, your ability to deflect the ball away is a great measure of your ability. In FIFA 22, you can deflect a ball using any part of your front foot. Impact Boost: Getting the ball is the best part, but keeping it is the hardest. Impact Boost provides deflection, control and shot power. The more you use Impact Boost, the more it will power up. Boosted Passing: When it comes to passing, keep a cool head and control your emotions. Boosted Passing takes player reactions into account. This helps to make harder passes more accurate and allows you to get away from the ball more easily. Players with boosted passing will be able to run the show and will take advantage of more space and room to manoeuvre. Squad Battles: Squad Battles have been enhanced, with the addition of a scouting feature. This allows you to view tactics and strategies, such as the formation of the team, an opponent’s set-up and strengths and weaknesses in greater detail. In-Play Photography: The new in-game camera, new cards, goals, free kicks, and shots all look fantastic in motion. The in-game camera will be set to high def and you'll be able to control where it looks. The new updated camera technology means you can exploit your opponent more by getting closer to their goal. Dynamic Player Animations: FIFA 22 players now have more animated and realistic movements. Attackers will be able to unlock their speed and use their
