Q: In Vue.js, why am I getting a "Field'method' does not exist on type 'Vue'" error? The problem is this: I am working on a Vue project that has a button that calls an Axios POST request, and returns a Promise that gets resolved/rejected to either pass data or return a failed message. Here's the relevant section of the code: `{{ state.title }}` We couldn't fetch the data. When the button is clicked, the Vue runtime throws an error: [Vue warn]: Property or method "clickAction" is not defined on the instance but referenced during render. Make sure to declare reactive data properties in the data option. Found in
