Here, you can set or even reset most of the customization options. The 'Configure' window is designed to provide a good overview of all the customization options and other settings. There are tabs for 'Settings', 'Options', and 'Output'. Here, you can set or reset all the options that you've already selected in the configuration window. The 'Options' tab displays options that cannot be edited; therefore, they are set automatically. Some options can be turned on or off.
