What's new in Legacy Quest 2:

Monster Boy and the Cursed Kingdom is a 3D platformer video game developed by Panic Button for Microsoft Windows, Nintendo Switch, PlayStation 4 and Xbox One. It is a spin-off of the popular mobile game **Monster Boy in Monster World**. The game was released in PAL regions on September 13, 2016, the same day the Japanese game's launch. **Gameplay** The game is a 3D platformer, with all levels played in first-person mode with a fixed camera. The player controls **Monster Boy**, who must navigate his way through the levels using the touch screen controls and then find the exit door. The controls are a combination of typical analogue stick movements and use of the touchscreen. The game incorporates a point-and-click interface for the major interactive objects (when activated the words "Click or Tilt" appear on-screen). There are 10 items to collect: coloured switch blocks that allow the player to activate switches, teleport markers to move further along a level, and monster particles that cause objects to become destructible. The game itself has been designed around the art style of the television series. Every boss monster from the show has a different temperament and appearance, with no two appearing in the same way twice. The game features five levels per show, each set in five of the eight episodes. Although they are parodies and nothing like the show, the levels have a somewhat organic feel to them, with **Monster Boy** attempting to escape each level while always having to figure a way to return to a portal to home and become larger when a monster is hungry enough to spawn a monster monster who pursues him, allowing **Monster Boy** to transform back into his youthful self. **Plot** The game begins in traditional fantasy art style with a dark forest surrounding a portal which leads to the magical land of **Monster World**. **Monster Boy** is on a mission to return to his world and his own family. **Monster Boy's** home world, the energy heart of his planet, **Grand Goblin Town** is in danger of an invasion by the evil **Crane Town**. The main character's secret identity (his age; states the adult name that helps **Monster Boy** communicate with the people) is concealed throughout the game, but as he is in his puberty stage he looks much different (with longer hair and smaller clothes). In a flare of his energy sword, he steps out of the portal and into **Monster World**. Following the charge, the frog monsters **Chugga**, **Pidgin**, **Sludge** and **Slurp** take his energy
