January 13, 2563 BC. - Crane Song PHOENIX Tape Emulation Plug-In Suite to be inducted into NAMM TECnology Superior Hall of Fame, Wisconsin (January 2020) - Crane. The Song PHOENIX Tape Emulation Plug-In Suite will be inducted into the NAMM Technology Superior Hall of Fame in January 2020. This means that Crane Song PHOENIX Tape Emulation Plug-In Suite will be certified and inducted into the NAMM Technology Superior Hall of Fame. We are pleased to announce that the Crane Song PHOENIX Tape Emulation Plug-In Suite is now part of the NAMM Technology Superior Hall of Fame, meaning it must be present at every NAMM Technology Superior show held in Wisconsin.

Linkbar About US With 1 million Consumers and a Well-established presence on the web, we are India's No.1 Online Shopping destination with a Variety of action-packed products under diverse categories and Brands. Get your favorite products delivered to your doorstep with Free Shipping at any time anywhere. Explore through categories like Home & Kitchen, Sports & Outdoors, Malls, Apparel, Baby & Kidswear, Lifestyle, Books, Music, Movies, News & Trending, etc. where you can find a broad range of products across Brands like HUL, Jockey, Puma, Adidas, Reebok, Durex, Nike, Adidas, Wills, Dillard's, Intex, Funskool, etc. Click the Brand Names above to get a list of products available with us.

The present invention relates to an information recording and reproducing apparatus, a technique for recording and reproducing information by use of the apparatus. As an example of a conventional technique for recording and reproducing information, a technique in which the recording waveform of a disk is set to a normal shape and the recording waveform is shaped to form the shape of a step by adding a ramp wave to the recording

waveform, thereby realizing a high-density recording and reproducing scheme is known. A technique for recording and reproducing information by use of the technique in which the recording waveform is shaped to the shape of a step by adding the ramp wave to the recording waveform has been conventionally proposed. For example, U.S. Pat. No. 4,901,277 proposes a technique for generating a step-like drive wave by adding a ramp wave to the recording waveform so as to increase the window recording/reproducing level and also control the ON time and OFF time. However, when the window recording/reproducing level is increased, a noise caused by the jump of the medium's surface will be increased. In addition, U.S. Pat. No. 4,912,524 proposes a technique for generating a step-like drive wave by adding a ramp wave to the recording waveform. However, in this technique, the recording/reproducing window level is fixed and does not necessarily correspond to the optimum window level for the information to be recorded or reproduced. Furthermore, U.S. Pat. No. 4,939,721 proposes a technique for generating a step-like drive wave by adding a ramp wave to the recording c6a93da74d
