overall, i'd say that 'the martian' is a great movie and would recommend it. ridley scott has really created a fantasy world that i think will appeal to a wide audience, and is easy to follow and very visually captivating. i'd definitely say that this is his best movie since 'blade runner', and it's his best sf movie since 'alien'. it's also one of his best movies overall, imo. i'd say that if you're a fan of ridley scott and/or science fiction, this is a must-see. 'the martian' is a great movie and will appeal to a wide audience. it's also a great addition to the science fiction genre and is one of ridley scott's best movies. i'd definitely say that this is his best movie since 'blade runner', and it's his best sf movie since 'alien'. it's also one of his best movies overall, imo. this really is an amazing release, maybe the best so far. the martian is the most fun movie i have seen in ages. i loved the pace. the martians are brilliant and their world is even more interesting than ours. i was impressed by the way that the pace was kept up. it was a great movie. and the martian dialogue was excellent. i was transfixed for all of the movie. i would like to see the martian movies i have seen in the past. the martian is a sci-fi thriller that follows an astronaut who is stranded on the red planet, a world that is virtually impossible to survive on. the film is based on the book written by andy weir, who also wrote the screenplay. the movie stars matt damon and is directed by ridley scott. the martian is one of the best movies of the year and a great sci-fi thriller. the martian is about an astronaut who is stranded on mars after his spaceship is destroyed. on this new planet he must survive for 6 months, which includes using a robot to communicate with his loved ones back on earth.

in any case, for the movie's depiction of the martian language, i've included one example of what a martian sentence might have sounded like. the word order is the same as english (there's no way to know that the order doesn't change), but the words are slightly different. not surprisingly, people are rarely given the opportunity to express their opinion of the movie in this forum, as it is generally considered 'not a spoiler' to mention that in the movie, watney is eventually rescued by the martians, and he survives the experience. i felt that this was something that i wanted to do, and i've taken some of the opportunity to talk about it here and in my other forum. there is some good evidence that suggests that the martians' language resembles more closely to the altaic language family, as the most accurate description of its words is in the english translation i mentioned earlier. also, i'm curious as to how 20th century fox has gone to great lengths to protect the identities of the major characters. there's a lot of talk about the movie's "special effects" as we see watney's martian habitat being constructed, but when watney is about to be rescued, we see a lot of the landing pad being constructed and the rover being powered up, yet the filmmakers aren't even bothering to show that they have only'simulated' his rescue, as opposed to actually capturing it on film. there were times when i didn't quite understand what was going on in the movie, but for the most part i didn't have trouble keeping up. in fact, as the movie went on, i found myself completely engrossed in the story, which was unusual for me, because i find it difficult to completely absorb a movie when i haven't read the book on which it's based. that said, i can't imagine anyone not enjoying this movie. a lot of it is just ridiculously funny, with the bulk of the humor being supplied by the strong performance of michael Peña as the crew's botanist. the one character i wish i had seen more of was watney himself, played by matt damon. i was surprised at how little we actually see of him on screen, and would have liked to have gotten to know him a bit better. i also missed the martian environment during most of the movie, but the filmmakers did a good job of conveying this through the design of the film, and the supporting cast did a good job of keeping me interested in the details. 5ec8ef588b
