
Virtual Riot Serum Presets Free !!TOP!!

Virtual Riot is such an iconic sound and is used and abused every day. Most people use the presets on the presets patch inside xfer, and they're good, but this one has its own top notch snares and top synth sounds that are in their own world. We wouldn't be us if this wasn't our best work yet, and it's been a long time in the making. This pack has over a thousand sounds in it all of which should inspire your creativity. Take some time with it, give it a chance and you're going to love it. The free downloads are the highest quality available but only work with the trial version of Serum. I mainly use it for cutting, slicing, mixing, mastering, and wav processing. But, I can also use it for beats, bass and cuts. The presets come in a zip file along with some tutorials. Nits, midbass, and thumps that sprawl into the lower frequencies, using reverb, modulation, and more. Great for a variety of dubstep, trap, EDM, and Hip Hop. 4 Bass Shots + 4 Keys were created using a clean, raw, and dirty setup. All presets were completely macroed and are available in WAV format. If you need to create that "killer" sound or you're just starting out, this pack will provide you everything you need. I also used some of my bass samples in different layers. Some presets were only meant to be used as a sample and not made into a preset for certain synths, other presets were used in different synths for completeness. The idea of this tutorial is to provide you with a few presets for a free "tutorial wavetable". As you can imagine, because of that, the duration of this tutorial is a bit short, but I hope it serves you well nevertheless. Also, the tutorial would not have been created without the help of Friends and Fellow Dubstep Producer Kele who took the time to try out the tutorial wavetables and provide his own comments. But hey, sometimes it pays off to be patient and knowing when the right time is to say what you're actually feeling...so be thankful that I had my Bauhaus albums when finishing this tutorial. Thumbs up to my real teachers - Kölsch and "Danse Macabre" - for taking me there!
